Attached are PADEP Indian Creek continuous monitoring data. Raw data are in Excel and some graphs are also attached. Both DO and pH show large diurnal fluctuations.

Bill,

I've attached the charts for each parameter at both sites. Please keep in mind that these data were not finalized, but there shouldn't be any major changes since they were corrected, graded and mostly reviewed.

Best,

Dustin

The charts would be great if you have them already. Otherwise, we can make the charts. Thank you for getting this to us. It will be very helpful.
